About Simplex

Simplex Software & Internet Services Ltd. (Simplex)

Data Center Services : this deals with the design and implementation of advanced solutions in the areas of voice and data communications, physical and network security, server rooms and data centres, enterprise systems setup, high availability solutions, etc.

With a huge experience in various technologies, the company has so far offered its services to private and public companies from Cyprus, Europe, the Middle East, U.S. and Australia as well as Cyprus Government/Semi-government organizations. Simplex's staff has been extensively involved in large banking and government projects as well as big projects in Europe and the Middle East.

Simplex's philosophy is to help its customers assessing their needs and proceeding step-by-step to the solutions that will satisfy their requirements while they remain within sensible costs. We ensure that our customers do not spend a fortune on solutions that will never pay back. We want to help our customers in building simple, yet scalable solutions that will evolve in parallel with their business targets.

All our partnerships ensure that our customers get world-class solutions in all aspects, including security, reliability and availability while they enjoy Simplex's excellent service and support.

levelas anAccredited Consultant for ITfrom the Cyprus Institute of Technology (accreditation number 396). The accreditation is only given to individuals and companies with a proven track of record in the area of IT consulting and is a proof for the quality of Simplex's services and an assurance for customers that they can indeed rely on Simplex for all their IT needs.

, does not come from nowhere:Simplexis an optimization method in the area ofOperations Researchwhich is used to solve complex optimization problems by reducing them to simpler ones; this is our target: optimize the way in which our customers operate by providing to them

simple, yet powerful and scalable solutions in order to compete and grow in the new e-Business era.

After all, it might be difficult for companies to follow the technology evolution so leaving their e-Strategy to the experts allows them to focus on their core business.
